COVID-19 impact analysis:

The outbreak of the COVID-19 pandemic left a significant impact on the global economy. The cooling fabrics market report provides a detailed study of the micro- and macro-economic impacts of the pandemic. Moreover, the analysis depicts the direct impact of COVID-19 on the cooling fabrics market. It recapitulates the detailed information about the market extent and shares owing to the impact of the outbreak. The report also emphasizes on the supply chain and the sales of the cooling fabrics market. Last but not the least; the study also exhibits a post-COVID-19 scenario, portraying different measures and initiatives taken by the government

bodies across the world.

The sports apparel segment accounted for the largest market share in 2019, contributing to more than half of the global cooling fabrics market, and is projected to maintain its dominant share in terms of revenue during the forecast period. On the other hand, the lifestyle segment is estimated to witness the fastest CAGR of 9.1% from 2020 to 2027.

North America held the largest share in 2019, generating more than two-fifths of the global cooling fabrics market. Increase in technological advancement, R&D investments, and the presence of a wide range of end-use application market propels the North America cooling fabrics market. The Asia-Pacific region, on the other hand, would showcase the fastest CAGR of 9.2% from 2020 to 2027. The transitioning consumer trend toward fitness and health consciousness coupled with government support drives the market growth.
