[Absolute Markets Insights](#) found that the industrial and commercial segment accounted for the highest market share in revenue in the global HVAC solution software market in 2020. The higher budget amongst companies, especially large industries, coupled with the higher focus of the end-users on commercial and industrial sectors due to their ventilation and heating requirements has played a major role in the higher share of this segment in the global HVAC solution software market in 2020. Industrial complexes are increasingly trying to reduce energy consumption using smart HVAC solutions, and are increasingly tying up with HVAC solution providers for creating a strategy to optimize energy use. Johnson Controls, for instance, is providing a range of products that are engineered to obtain higher efficiency, thereby reducing

the need for higher energy. Regular maintenance and calibration can also be availed through the company's packages, which in turn is helping the end-users in reducing maintenance issues which can arise in the future.

COVID-19 Pandemic is Expected to Have a Positive Impact: The COVID-19 pandemic has affected the construction sector massively. Companies have opted for work from home options to maintain social distancing, and prevent the spread of coronavirus. Government bodies also have encouraged working from home, as the virus was spreading fast in several regions. However, the rolling out of the vaccines has enabled employees to return to office, and various companies are working on creating proper ventilation and heating across workspaces to help tackle the virus. Studies show that optimal ventilation can help in the reduction of surface contamination by removing several particles before they can land on various surfaces. Added care is being taken by companies to deploy proper HVAC techniques to create a safe working environment for the employees, thereby helping in the growth of the global HVAC solution software market in the coming years.

About Us:

Absolute Markets Insights assists in providing accurate and latest trends related to consumer demand, consumer behavior, sales, and growth opportunities, for the better understanding of the market, thus helping in product designing, featuring, and demanding forecasts. Our experts provide you the end-products that can provide transparency, actionable data, cross-channel deployment program, performance, accurate testing capabilities and the ability to promote ongoing optimization. From the in-depth analysis and segregation, we serve our clients to fulfill their immediate as well as ongoing research requirements. Minute analysis impact large decisions and thereby the source of business intelligence (BI) plays an important role, which keeps us upgraded with current and upcoming market scenarios.
