The experts at Brand3D are transforming retail spaces and consumer experiences to help prepare retailers and consumers alike for shopping in the metaverse. These 3D technologies allow for a 360-degree view of a product with dimension and life-like detail thereby bridging the gap between real and virtual shopping experiences. Today’s crowdfunding for Brand3D is serving the demand that generational consumers have sparked in the retail space.

The company’s product offers a cost-effective SaaS platform to enhance 3D content allowing consumers to engage with products in a more visual way. The platform

dramatically increases conversion rates for retailers, reduces product returns and creates happier customers.

“Our Telly Award™ winning Software-as-a-service platform provides user-friendly tools that allow any online business to quickly create an immersive 3D experience” Hans Hansen, CEO of Brand3D.
