

Online Travel Market Expected to Reach \$1,835.6 Billion by 2031 Allied Market Research

People now opt for more than one trip every year with the growth in living standards and increased purchasing power

PORTLAND, 5933 NE WIN SIVERS DRIVE, #205, OR 97220, UNITED STATE, March 25, 2022 /EINPresswire.com/ -- According to a new report published by Allied Market Research, titled, "[Online Travel Market](#) by Service types, Platforms, Mode of booking and Age Group: Global Opportunity Analysis and Industry Forecast, 2022-2031," "The global online travel market was valued at \$354.2 billion in 2020, and is estimated to reach \$1,835.6 billion by 2031, registering a CAGR of 14.8% from 2022 to 2031. Globally, the number of people in the middle and upper middle classes is increasing rapidly.

Online Travel Market

People now opt for more than one trip every year with the growth in living standards and increased purchasing power. Furthermore, for convenience and easy transactions, people have started availing online travel services, thus saving time & resources, fostering the growth of the online travel market. Growth of the online travel market is driven by increase in internet penetration, rise in disposable income of people in emerging markets, and ease of comparing a variety of travel options online. Market players introduce innovative travel and vacation package deals to assist travelers' in making sound travel decisions as per their spending capability, such as affordable packages for international destination, discounts on car rentals and cash back on international flights.

Political disturbance and natural calamities are some of the factors that restrain the growth of the online travel market. Furthermore, low digital literacy and unavailability of the internet connection in remote areas are expected to limit the growth of the market. Outbreak of COVID-19

negatively affected the growth of the online travel market in 2020. Frequent lockdown practices, social distancing and ban on travel and tourism in most of the countries were some of attributes for decreased growth of the market in 2020.

According to the online travel market analysis, the online travel market segmented into service type, platform, mode of booking, age group, and region. On the basis of service type, the market is categorized into transportation, travel accommodation, and vacation packages. By platform, it is segmented into mobile and desktop. On the basis of mode of booking, it is segregated into online travel agencies (OTAs) and direct travel suppliers. On the basis of age group, market is segmented into 22-31 years 32-43 years 44-56 years and >56 years. Region wise, it is analyzed across North America (the U.S., Canada, and Mexico), Europe (Germany, France, UK, Italy, Spain, and rest of Europe), Asia-Pacific (China, India, Japan, Australia, South Korea, and rest of Asia-Pacific), and LAMEA (Brazil, Argentina, UAE, Saudi Arabia, South Africa, and rest of LAMEA).

According to the online travel market trends, on the basis of service types, the transportation segment was valued at \$145.8 billion in 2020, and is projected to reach \$670.6 billion by 2031, growing at a CAGR of 13.6% from 2022 to 2031. Transportation segment is projected to maintain its lead in the overall online travel services market, owing to rise in online flight bookings. Expansion in the number of low-cost carriers and growth in the number of connecting flights for tier I and II cities across the globe, drive the growth of flight bookings, which significantly contributes for the online travel market growth during the forecast period. Tier I cities are densely populated and have higher living expenses and tier II cities are with moderate cost of living and decent infrastructure and connectivity.

By platform, the mobile segment accounted for the significant share in the global market in 2020 and is expected to increase its share during the forecast period. Increased penetration of smartphones, growing confidence of people in safety of mobile payments, growing digital literacy and social media usage for advertising are likely to contribute for the growth of the market through mobile segment.
