

Natural Food & Drinks Market Share Is Set For Rapid Growth Rate of 11.44% by 2031 | Nestle S.A., Bunge Ltd., Dean Foods

Factors supporting the Natural Food & Drinks market growth include consumer inclination toward health & wellness, change in lifestyle, and food preferences.

PORTLAND, OR, UNITED STATES, March 25, 2022 /EINPresswire.com/ -- According to a new report published by Allied Market Research, titled, "[Natural Food & Drinks Market](#)" by Product Type, Distribution Channel, and Packaging: Global Opportunity Analysis and Industry Forecast", 2022–2031, was valued at \$120,446.60 million in 2020, and is estimated to reach \$361.3 Billion by 2031, growing at a CAGR of 11.44% from 2022 to 2031.

Natural food & drinks refer to food products that are manufactured without the use of hormones, antibiotics, or artificial flavors. Stringent regulatory standards do not exist for natural food & drinks in most of the countries. Thus, natural labels are normally used by manufacturers across the globe, due to lack of adequate guidelines. Natural food & drinks are available at several stores that sell organic food products. In 2021, the supermarkets/hypermarkets segment accounted for around two-fifths share of the global natural food & drinks market.

The growth of the natural food & drinks industry is driven by rise in inclination of consumers towards health & wellness, safety, social impact, and experience in food purchasing decisions and properties offered by natural food, including convenience, price, and taste. Moreover, rise in awareness toward healthy food ingredients is expected to offer substantial growth opportunities to health food industry players. The natural food & drinks market possesses high growth potential, owing to the fact that several foodservice providers, including restaurants & hotels are inclined toward providing healthy food & drinks to cater the needs of health-conscious consumers. Thus it is expected that the rising awareness among the consumers regarding natural foods will proliferate the natural food & drinks market size globally.

Consumer preferences for foods with non-genetically modified ingredients resulted in steep demand for natural food & drinks. Increase in demand for "clean label" products is due to increase in health awareness and media coverage about the drawbacks of foods containing Genetically modified organisms(GMOs). In addition, the "clean label" products are gaining popularity as natural food & drinks market trends and recently pushed into the mainstream

market by popular books, television shows, and celebrity endorsements. However, high costs of natural food & drinks compared to conventional food products hamper the natural food & drinks market growth.
