About Futira:

Futira is issuing the Futira token to finance building telecommunications networks in poor countries and help connect the unconnected. It is founded by Mr. Hani Hebashi, a real estate magnate in Georgia, and Dr. Hatim Zaghloul, the co-inventor of high-speed mobile telecommunications including WiFi, 3G, 4G, WiMAX, and 5G.

Futira will be the sole means to pay for network services; this is to assure demand, and Futira will eventually be able to be used for cash transfers and payments as market penetration increases. Futira use should increase the demand for the tokens which is good for the users and investors.
