

# Scraperite introduces sustainable packaging for plastic razor blades

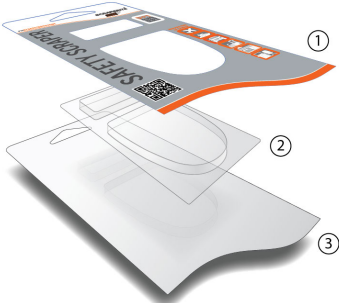

*Scraperite beats 2025 EU Directives for reducing packaging waste of consumer packaged goods*

ORMOND BEACH, FLORIDA, UNITED STATES OF AMERICA, March 28, 2022 /EINPresswire.com/ -- [Scraperite](https://www.scraperite.com/) rethinks its packaging to incorporate simple material changes and assembly design to reduce its ecological footprint. The innovative plastic razor blade safety scraper company now uses a trapped blister assembly structure to keep each part separate, making the packaging fully recyclable.

Sandwiching the blister between two paper cards without gluing the plastic itself assures the plastic separates cleanly from the card material. This means no adhesive or paper residue remains on the blister which can be easily recycled. The company uses only PET materials for all its blisters and clamshell. PET, recycling symbol 1, is like a water bottle and easily recycled through conventional community recycling programs.

These basic features exceed the guidelines of several Articles in the [European Directive \(EU\) 2018/852](https://eur-lex.europa.eu/eli/dir/2018/852/20180501)

[94/62/EC](https://eur-lex.europa.eu/eli/dir/2018/852/20180501) on consumer packaged goods waste management, as amended in May 2018. One key element is ensuring 100% recyclability for each portion of packaging for plastic razor blades and

	<h2>WHY DOES IT MATTER?</h2>
<h3>Trapped Blister Packaging</h3>	
<p>NO GLUED PLASTIC NO PVC FULLY RECYCLABLE FOR OUR FUTURE FOR OUR CHILDREN</p>	 <ol style="list-style-type: none"> <li>1. Top card</li> <li>2. P.E.T. Blister</li> <li>3. Lower card</li> </ol> <p><a href="https://resellers.scraperite.com">https://resellers.scraperite.com</a></p>

Why does it matter? Scraperite offers new smart eco friendly packaging for plastic razor blades
