

When AI and Humans Work Hand-In-Hand: Base64.AI Automated Document Processing Integrates with UiPath Validation Station

Base64.ai, a UiPath Advanced Technology Partner, announces integration with UiPath Document Understanding Validation Station.

NEW YORK, UNITED STATES, March 30, 2022 /EINPresswire.com/ -- New York-based document processing AI company [Base64.ai](https://base64.ai) has taken another impressive step forward in revolutionizing automation in the workplace. Base64.ai's mission is to help companies get work done faster by automating manual data entry, so

these companies can focus on the more important tasks in growing their business. Base64.ai has completed an integration with [UiPath](https://ui.com) Document Understanding Validation Station, allowing UiPath users to automate data extraction with Human-In-The-Loop (HITL) validation. With this

Base64.ai Automated Document Processing and UiPath Validation Station Integration

“

We are excited to announce Base64.ai is now integrated with UiPath Validation Station. This feature adds a Human-In-The-Loop verification step for all types of documents and automation projects.”

*Ozan Eren Bilgen, CEO of
Base64.ai*

new integration, any company can harness the power of automation while keeping humans involved in the process to ensure as much accuracy as possible.

HITL-powered artificial intelligence allows for more accurate processing of constantly evolving document layouts and unstructured data. While Base64.ai boasts an impressive 99%+ accuracy, the HITL boost will give companies the confidence they need to automate their document processing workflows while having human oversight. This approach allows automation tools such as Base64.ai to do all the hard work, leaving employees the simple task of validating the collected data.

"We are excited to announce Base64.ai is now integrated with UiPath Validation Station. This

feature adds a Human-In-The-Loop verification step for all types of documents and automation projects. Customers using Base64.ai on-premises or in the cloud can benefit from this additional accuracy enhancement at no extra cost," commented Ozan Eren Bilgen, CEO of Base64.ai.

Base64.ai specializes in unstructured forms with its no-template AI, which is why it can easily process over 700+ types of documents and continue to learn new ones. Base64.ai's integration with UiPath Validation Station can be used on all documents, including forms, IDs, and receipts. Base64.ai provides both on-premises and cloud-based services, instantly extracting data from documents hundreds of times faster than human employees. With over 80% of mishaps in the workplace attributed to human error, Base64.ai aims to prevent these mistakes so that employees can spend more time on the things that matter. With the new Validation Station integration, companies can rest assured with Base64.ai handling all document processing while still having a human help verify and perfect the platform's machine learning capabilities.

Experience how [Base64.ai understands all types of documents](#) and instantly processes their data at Base64.ai.
