## Some Key Highlights From the Report

- Hardware segment revenue is expected to expand at a significantly robust CAGR during the forecast period owing to rising need to optimize hardware components such as GPUs and SSDs. Additionally, rising demand for strong central processing units, high graphics capabilities, and large storage capacity are expected to augment revenue growth of this segment.

- 1-to-many segment is expected to lead in terms of revenue share over the forecast period owing to rising demand for faster file sharing and remote desktop capabilities. This allows a number of users to share a storage capacity that can be accessed from any computer with an Internet connection.
- North America is expected to account for a relatively larger revenue share than other regional markets over the forecast period as a result of end-users increasing adoption of centralized workstation systems. Businesses in the region have been adopting cloud technology, which is boosting demand for centralized workstations.
