Spinal traction is a nonsurgical therapy, which is used to stabilize the damaged part of the spine by delicately separating the spinal column in opposite directions. It is used to relieve pressure on the spine, straighten it, and improve the body's ability to heal itself. It is a form of decompression therapy which can be done manually or mechanically. Severe conditions like pinched nerves, herniated discs, sciatica, and degenerative disc are treated with the help of spinal traction device. The entire procedure usually requires 20 to 28 treatments which lasts between 30 to 45 minutes each
