Law enforcement app for police department

Speaking about the Unified Communications app/Sheriff's app, Anoop Menon, the company's CEO, said, "This is a major milestone for us. We have been working on projects for law enforcement agencies in the US for a while now. We found that our product will help law enforcement agencies like Sheriff's offices, police departments, and even city/county offices to streamline their internal and external communications. Our product has features that help law enforcement agencies securely broadcast information to their teams which is instantly delivered to them via push notifications on the mobile app. The app also has features to schedule and deliver public notifications to citizens. While social media pages exist for law enforcement agencies, not everyone who follows a page gets all the alerts. With the app, the delivery of critical information is guaranteed."

Confianz Global will provide white-glove service to every law enforcement agency that adopts their product. They also have bigger plans for this law enforcement app product.

Confianz Global will listen to pain points by every law enforcement agency that adopts their product and work on solving those pain points. These features will be provided to every law

Law enforcement agencies protect us so that we can have a peaceful life. We are so proud to build a product like this that will help the agencies to keep officers and the citizens they serve safe.”

Anoop Menon

enforcement agency that is a customer as a free update. They plan to build features that help citizens to report crime or tips to the law enforcement agencies in a secure manner.

Typically law enforcement agencies still use outdated technologies like pagers. Confianz Global is pricing this product in a manner that law enforcement agencies in large cities to very small towns in the US can afford. Mr. Menon added, “Law enforcement agencies protect us so that we can have a peaceful life. We are so proud to build a product like this that will help the agencies to keep

officers and the citizens they serve safe. This product reduces the gap between law enforcement agencies and the new generation who depend on mobile phones for nearly everything. The app also has additional features like links to important city/county information, applying for gun permits, and integrates with the existing inmate/jail management system.”
