Plastic Furniture Market

Plastic furniture is more affordable and efficient as compared to other materials. Moreover, plastic furniture are available in various designs, types, and colors that can easily match the ambience of home, restaurant, hotel, and offices which is also the current plastic furniture market trend. Apart from having flawless designs and vibrant colors, plastic furniture are extremely durable. As the metal chairs and wooden chairs are stiff, they deform or break quickly. On the contrary, the flexibility of plastic furniture makes it easy for them to resist extreme pressure and damages.

“

The plastic furniture market is expected to witness significant growth, owing to increase in demand for housing real estate space and rise in customer demand for premium & luxury furniture.”

Moreover, eco-Birdy a European furniture manufacturing company has currently launched ecoBridy recycled plastic furniture for kids. The company further announced that its complete line of production plastic furniture is 100% recyclable and does not contain any harmful chemical. Hence, rise in trend of using recycled plastic furniture by various stakeholders is expected to create lucrative opportunity for the plastic furniture market growth. However, the major impact of plastic furniture is on the environment, as it takes many years to decompose and releases harmful toxins into the soil.

Moreover, plastics are omnipresent in the marine environment, thus polluting environment and requiring urgent actions. In addition, presence of plastic pose a threat not only to marine life but also to agricultural land. This is attributed to the fact that plastic is responsible for the dilapidation of the agriculture land and atmosphere, which continuously use precious earth resources, in particular oil. This is now posing threat to environmental and agricultural production. Thus, adverse effects of plastic on marine life and agriculture land is restricting the growth of the plastic furniture market.

Region wise, North America acquired the largest plastic furniture market share in 2019, and is expected to grow at a CAGR of 4.0%.

The outbreak of the COVID-19 pandemic has created a number of challenges for exporters in developing and developed countries. The challenges witnessed by exporters of plastic furniture products are likely to remain for the foreseeable future, as different states and governments around the world attempt to tackle COVID-19 with various measures.

However, implementation of lockdown and curfew practices globally have affected domestic as well as international production of plastic furniture, which, in turn, hampers growth of the overall market. Thus, the outbreak of COVID-19 has negatively impacted the plastic furniture market in 2020, as sales of companies have reduced and operations have been halted.
