

# MRNA Vaccines Market Size & Trends By Type, Application and Forecast Till 2030

*The global mRNA vaccine market is growing at a CAGR of 19.76% over the forecast period*

PUNE, MAHARASHTRA, INDIA, March 30, 2022 /EINPresswire.com/ --

According to a report published by AMI, the global [mRNA vaccines market](#) is anticipated to grow at a CAGR of 19.76% during the forecast period. The rapid advancement in medical technology that promotes the development of mRNA vaccines, coupled with the growth of infectious diseases globally is a major reason for the higher growth in revenue in the global mRNA vaccines market.

mRNA vaccines are being developed for numerous diseases such as cancer (tumors, ovarian cancer, renal cancer, etc.), infectious diseases (COVID-19, malaria, Zika virus, etc.), and other rare diseases. Scientists are increasingly working on developing vaccines to prevent the spread of cancer, which is causing a high disease burden globally. It is the leading cause of death worldwide, claiming about 10 million lives in 2020 alone. Moderna, for instance, is applying their mRNA technology for the development of immunotherapy for cancer. Immune cells in the human body are being trained to identify and destroy cancer cells in the same manner as they fight against foreign organisms that enter the body.
