## Industry Trends

Lumakras is a drug that is used to treat adults with non-small cell lung cancer (NSCLC) that has spread and has a mutation (change) in the KRAS gene. It's given to patients who have already had at least one other systemic treatment. According to the American Cancer Society, most lung cancer data include both small cell lung cancer (SCLC) and non-small cell lung cancer (NSCLC). SCLC accounts for about 13% of all lung cancers, while NSCLC accounts for 84%. Furthermore, the American Society of Clinical Oncology projected that 2.3 million people would be diagnosed with lung cancer worldwide in 2021. In the United States, an estimated 235,760 adults (119,100 men and 116,660 women) were diagnosed with the disease in the same year. Lung cancer is one of the most common cancer and the leading cause of cancer death. This disease is expected to cause deaths of 131,880 people (69,410 men and 62,470 women) in the United States in 2021.

Increasing pipeline medicines related to the lumakras drug is one of the significant factors expected to drive the growth of lumakras drug market over the forecast period. Rising incidence of various cancers, as well as growing popularity of advanced therapies, are fuelling the market growth. Major players are also contributing to market growth through developments. For instance, Mirati Therapeutics, Inc., a clinical-stage targeted oncology corporation, announced positive topline results from the potentially registration-allowing cohort of Phase 2 KRYSTAL-1 study, evaluating adagrasib in patients with advanced non-small-cell lung cancer (NSCLC) harboring the KRASG12C mutation consistent with previous systemic therapy, in September 2021. The company intends to publish detailed data from the KRYSTAL-1 study's continuing Phase 2 registration-enabling cohort in previously treated patients with KRASG12C-mutated NSCLC at a medical congress in early 2022.

SARS-CoV-2 (COVID-19) is one of the most serious public health emergencies the civilization has ever seen, with more than 770,000 deaths and immeasurable economic costs. COVID-19 was

declared a global pandemic by the World Health Organization on March 12, 2020, as the epidemic condition worsened. In the first half of 2020, the impact of the COVID-19 pandemic on cancer care has led to decreases and delays in detecting new cancers and providing treatment. However, now that the covid-19 illnesses is being handled effectively by economies, key players and the government are focusing more proactively on other diseases, including cancer. The enhanced promise of innovation in cancer therapy showcases potential opportunities for lumakras drug market participants in the healthcare industry to develop in the near future.
