

Blood Glucose Meters Market Grows At Rate 11% Due To The Rising Prevalence Of Diabetes

The Business Research Company's Blood Glucose Meters Global Market Report 2022 – Market Size, Trends, And Global Forecast 2022-2026

LONDON, GREATER LONDON, UK,
March 31, 2022 /EINPresswire.com/ --

The rising prevalence of diabetes is driving the market and shaping the blood glucose meters marketing strategy. The changing lifestyle, increase in alcohol consumption, physical inactivity, and unhealthy

eating habits are leading to an increase in obesity across the globe. Such exponential growth in obese people is causing a stern increase in the purchase of blood glucose meters. Due to obesity, fat tissues release more fat molecules into the blood affecting insulin-responsive cells, which results in reduced insulin sensitivity, in turn, causing diabetes. According to the study by the International Diabetes Federation (IDF), there will be a 48% increase in diabetes around the world by 2045.

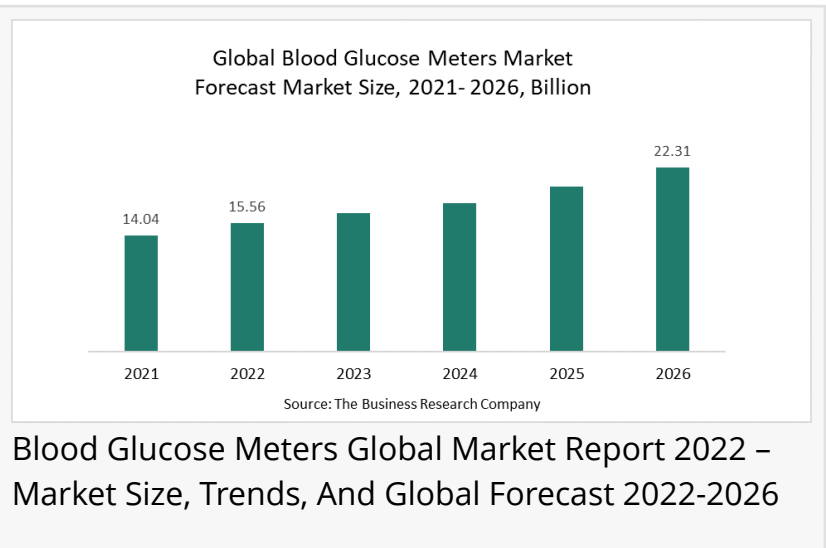

The global [blood glucose meters market size](#) is expected to grow from \$14.04 billion in 2021 to \$15.56 billion in 2022 at a compound annual growth rate (CAGR) of 10.9%. The global blood glucose meters market share is expected to grow to \$22.31 billion in 2026 at a CAGR of 9.4%.
