Industry Trends

Diaphragm valves are a breed of specially designed valves that are used in hygienic and aseptic processes which are present in the pharmaceutical, and the food and beverages industry. Hygienic diaphragm valves are commonly used in the biopharma sector for the control of fluids. The design of diaphragm valves for biopharmaceutical applications is highly critical, primarily because these process are critical, and leakages can have catastrophic effects on the environment, as well the health of the employees. The axial movements of the pistons, the diaphragm moves closer to the body, thereby opening the valve. The diaphragm ensures double sealing of the valve, thereby making it hygienic and safe for operation. INOXPA INDIA PVT.LTD., for instance, provides hygienic diaphragm valves which can be used in the biopharma industry, and is designed in accordance with the specifications laid out by the European Hygienic Engineering and Design Group. The rising demand for fool-proof operating valves in the biopharma sector, coupled with the advancement in manufacturing technology that promotes the development of diaphragm valves, is leading to the growth of the global hygienic diaphragm valves in biopharma market.

COVID-19 Impact

The COVID-19 pandemic has affected the operation of businesses, and the lives of individuals as a whole. Lockdown measures imposed by government bodies, along with social distancing measures, have reduced the movement of individuals. As a result of the same, the manufacturing sector faced a labour crunch, and production dropped. The market participants had to consider the impact on the supply chain. However, the biopharma sector saw considerable growth during the pandemic, as there was a higher demand for equipment parts. Hygienic diaphragm valves are expected to see a growth in the coming years, primarily driven by the adoption of these valves in the highly demanding pharmaceutical sector. Therefore, the global hygienic diaphragm valves in biopharma market is expected to see considerable growth in the coming years, driven by the rise in adoption of these valves in the biopharma industry during the pandemic.
