Industry Trends

In the global angio suites market, the major drivers contributing to the market growth are government funding along with the development of new innovative medical devices. Due to increasing incidence of life-threatening diseases, diagnostics procedures are increasing all over the world. The direct and indirect costs of diagnosis as well as imaging are observed to have increased over the period of time. In order to develop cost-effective and efficient medical devices, various governments in developed countries are actively funding research & development (R&D) activities, which is contributing towards the growth of global angio suites market.

In 2017 – 2018, the State Government of New South Wales (NSW) in Australia sanctioned medical devices fund of about US\$ 8 million as the government wanted to encourage and support investments in the development and commercialization of medical devices and other related technologies. Private companies are also investing into R&D, which is anticipated to further boost the growth of global angio suites market. In August 2021, Biosensors established a global R&D center that was meant to provide round-the-clock R&D services. Many innovation centers

have been set up in Shanghai, Singapore, California, and Europe in line with the company's global expansion strategies within the global angio suites market.

High costs associated with the installation of angio suites is restraining the growth of global angio suites market. In countries where medical infrastructure is not developed, especially those in the Middle East & Africa, the lack of skilled professionals and standard usage guidelines is significantly impacting the market growth. However, various government are spending heavily on developing healthcare sector in their countries, which is anticipated to address the concerns, thus favoring the growth of global angio suites market. For instance, in August 2019, due to high costs, U.S. Food and Drug Administration (FDA) decided to replace pressure wires and adenosine with image-based fractional flow reserve (FFR). FDA cleared three new angiography imaging-based FFR assessments for use in catheterization laboratory.

The Angio Suites Market report provides a basic overview of the industry including definitions and classifications. The market analysis is provided for the international markets including development trends, competitive landscape analysis and key regions development status. The study gives an intricate examination of its applications including a detailed cost evaluation analysis of products that are available in the worldwide market with regards to existing manufacturer profit margins.
