

Future Trend of KVM Market by Regions, Type and Application, Forecast till 2030

Global KVM market was valued at US\$ 1010.34 Mn in 2020 growing at a CAGR of 3.8% over the forecast period (2022 - 2030).

PUNE, MAHARASHTRA, INDIA, March 31, 2022 /EINPresswire.com/ --

According to [Absolute Markets Insights](#) report, product segment accounted for the largest share and is expected to be the fastest growing segment in the global [KVM market](#) over the forecast period. Various types of KVM products provided in the market include KVM switches, KVM extenders, KVM matrix, and accessories amongst others. Several companies are investing in expanding their operations in order to boost their worldwide footprint and market presence. For example, in November 2020, Black Box released the KVD200-2H 4K HDMI dual-head desktop KVM switch, a reasonably priced KVM switch targeted for professional users who need to handle two computers, such as a desktop and a laptop computer, using a single keyboard and mouse. The KVD200-2H KVM desktop switch is suitable for customers that demand easy, cost-effective control over numerous PCs while maintaining flawless performance.

A keyboard, video, mouse (KVM) is a hardware device that connects a keyboard, video display and mouse to several computers. It enables a user to control multiple computers with a single input/output (I/O) device. KVM can also be used to manage multiple server groups in a data centre. The KVM switch is commonly used to support terminals on both ends of a connection, allowing remote and local access to all computers. Enterprises' increasing demand for data storage devices is driving the demand for KVM products. In terms of revenue, global KVM market was valued at US\$ 1010.34 Mn in 2020 growing at a CAGR of 3.8% over the forecast period (2022 - 2030).

Digital KVM segment is estimated to witness fastest growth over the forecast period in the global KVM market. Digital KVM are becoming more popular in data centers owing to its ease of integration with existing infrastructure, which saves time and lowers cabling costs. It also enables the control of other devices such as serially controlled routers, UNIX servers, and other power-controlled devices. Furthermore, the world is shifting toward digital-based products due to their ease of accessibility. Digital KVM is a powerful IT administrator tool that can assist in the remote access of IT infrastructure in a quickly changing business landscape.

MAC segment is estimated to witness fastest growth rate over the forecast period. Furthermore, companies in the KVM market are developing KVM products which provide multi-platform support. For instance, IOGEAR developed all type of KVM switches, KVM extender and other products, which support all types of operating systems including MAC.

HDMI segment is estimated to witness substantial growth rate during the 2021 – 2029 period in the global KVM market. The High-Definition Multimedia Interface (HDMI) is a proprietary audio/video interface that allows an HDMI-compliant source device to transmit uncompressed video data as well as compressed or uncompressed digital audio data. The primary advantage of HDMI is its capacity to transfer high-bandwidth data (video, audio, and Ethernet) over a single cable.
