In 2019, the floor coverings segment accounted for significant revenue share in the total global home decor market, and is expected to grow at a CAGR of 4.0% throughout the forecast period. North America is one of the prominent regions, which accounted for a sizeable share of the total market in 2019. The global home decor market has witnessed significant growth over the years, and is expected to grow at a steady pace during the forecast period. This is attributed to the fact that market players are focusing on developing eco-friendly products, owing to rise in environment awareness.

Surge in demand for trendy and unique furniture is anticipated to provide lucrative growth opportunities for the home decor industry :-

The floor covering segment occupied the largest share in the overall home decor market in 2019, and is expected to maintain its leading position throughout the forecast period, owing to the wide adoption of floor coverings, globally. In addition, surge in disposable income and improvement in living standards in the emerging countries such as China and India along with rise in affinity of consumers toward consumer-friendly home décor products are anticipated to

boost the demand for home decor products. However, availability of low-quality and counterfeit products and fluctuations in the prices of raw materials used to manufacture these products restrain the market growth.
