"The average age for a person with mesothelioma in the USA is about 72 years old and for most their exposure to asbestos took place decades ago. We have been assisting Navy Veterans with mesothelioma for nearly two decades and most people like this do recall the specifics of how they were exposed to asbestos in the navy. Most Navy Veterans who have mesothelioma that we have spoken with over the years worked in a ship's engine room, as a member of a repair crew, as a skilled worker like a plumber, electrician, welder, pipefitter, and or they supervised repairs on a ship or submarine.

"If your loved one has just been diagnosed with mesothelioma in Colorado, please get serious
