Yo!Kart B2B Marketplace Solution

yo!kart
MULTI VENDOR SYSTEM

The B2B marketplace offers businesses a centralized platform to connect with other organizations/businesses and conduct trade, creating a streamlined transaction process. Yo!Kart B2B can be an excellent platform for businesses looking to build their own B2B marketplaces such as Amazon Business or Alibaba.

About Yo!Kart B2B Version 1.0:

The software has a clean, efficient, and intuitive user interface (UI) making it comfortable for businesses to interact and trade. The team has introduced a wide set of B2B eCommerce features RFQ, bulk order discounts, minimum order quantity, supplier search, etc.

There can be four types of sellers in the marketplace - Distributors, Wholesalers, Manufacturers & Service Providers. While the first three categories are common, the fourth category is for sellers offering unique services such as Logo design, custom packaging, etc. Services are usually sold as an add-on alongside bulk products in the marketplace but, there is also the provision to sell the services separately. The Yo!Kart team has also introduced a verification tag, founding

We found no marketplace framework or software which offers more B2B features for this price than Yo!Kart - and it was very easy to install. The service team is great and helps a lot!"

Tobias B. (CEO and Founder)

member tag, and Gold subscription tag for the sellers. The admin can verify and enable these tags on the front end.

Yo!Kart B2B has a competitive pricing structure with plans starting at \$1499. It's a one-time fee with which you can own the platform for a lifetime without paying any monthly fees or commission charges. This makes it a compelling solution providing an edge over its competitors such as SuiteCommerce, BigCommerce, and others.

This is what the spokesperson from Yo!Kart team has to say on the launch:

"Over the years, we have successfully managed to develop and deliver custom B2B marketplaces to meet our clients' needs. UNI Diamonds, Bozinga are such custom B2B e-commerce marketplaces built using Yo!Kart."

"As the demand grew over the last few years, we felt the need to develop a turnkey B2B multi-vendor software that provided businesses standard B2B ecommerce features/functionalities, while reducing their go to market time. Yo!Kart B2B is a product of our months of planning, development work, rigorous testing, and internal feedback sessions to build a reliable B2B solution with most bases covered.

And, we couldn't be more excited to launch our B2B multi-vendor software."

The spokesperson added that the software is extremely scalable and flexible just like its base platform, and provides all standard marketplace features to start the next Alibaba or Amazon Business.
