NEW YORK, NY, UNITED STATES, April 1,
2022 /EINPresswire.com/ -- The
global [Hospital Acquired Infections](#)

[\(HAI\) Diagnostics market](#) is forecast to reach USD 5.68 Billion by 2027, according to a new report by Reports and Data. The market is growing due to the rise in the number of HAIs or hospital-acquired infections, and growth in the incidence of contagious virus-related diseases. The technological advancement and increasing awareness among the public have led to an increase in the number of surgical operations, which in turn is augmenting the demand for the industry.

Immediate diagnosis of infectious disease is the present need of the time due to evolving pathogens and increasing the occurrence rate of hospital-acquired infections. The government of various nations has been emphasizing on rapid diagnosis of infectious disease as a strategic priority like in the U.S. The global COVID-19 pandemic is another mentionable crucial factor that is boosting the demand for laboratory-based molecular testing capacity and reagents.

However, one of the mentionable challenges for the growth of the market players amidst this epidemic is supply chain management. As an instance, in China, when the pandemic reached the zenith, the transportation was to a halt that resulted in breaking the supply chain. The main reason for such disruption is not because companies are not manufacturing, but it was because the mobility of comments from one part of the nation to another was becoming a challenge. Thus, such disruption in the supply chain may hinder the growth of the market.
