

Electric Toothbrush Market Expected to reach \$6,549.1 Million by 2031

The adult electric toothbrush accounted for more than 76% of the global electric toothbrush market in 2020.

PORTLAND, 5933 NE WIN SIVERS DRIVE, #205, OR 97220, UNITED STATE, April 1, 2022 /EINPresswire.com/ -- According to a new report published by Allied Market Research, titled, "[Electric Toothbrush Market](#)" by Bristle, Head Movement, and End User: Global Opportunity Analysis and Industry Forecast, 2022–2031," the global electric toothbrush market size was valued at \$3,070.8 million in 2020, and is projected to reach \$6,549.1 million by 2031, growing at a CAGR of 8.1% from 2022 to 2031. The adult electric toothbrush accounted for more than 76% of the global electric toothbrush market in 2020.

Electric Toothbrush -amr

The electric toothbrush is a type of toothbrush that cleans teeth using quick and automated bristle motions. Brushing teeth by hand might harm gums and enamel. The electric toothbrush has a pressure sensor that stops users from brushing too aggressively, which is considered to be harmful. Thus, consumers have started to adopt electric toothbrush as an oral care product on a large scale.

Electric toothbrush has witnessed increase unpopularity in the recent decade, due to rise in awareness towards oral hygiene among people and increase in oral complications globally. Moreover, electric toothbrush helps in effective removal of plaque and calculus from the oral cavity as compared to the manual toothbrush, thereby reducing oral problems such as gum diseases and tooth decay. In addition, the use of soft bristles in electric toothbrush helps in fighting tooth sensitivity. FOREO created ISSA, a unique electric toothbrush made of non-irritating silicon bristles, which reduce the pain caused by brushing in sensitive areas of oral cavity.

According to electric toothbrush market analysis, the electric toothbrush market is segmented on the basis of bristle, head movement, end user, and region. On the basis of bristle, the global electric toothbrush market is divided into soft bristles and nanometer bristles. The soft bristles segment is a major contributor to global electric toothbrush market, and is anticipated to be the most lucrative segment during the forecast period, as it offers several oral benefits such as prevention of plaque formation & dental caries and is better suited for sensitive teeth.

On the basis of head movement, the market is classified into rotation/oscillation and sonic/side-to-side. The sonic/side-to-side segment is expected to grow at the highest rate, due to effective cleaning of oral cavity as compared to rotation/oscillation head movement.

On the basis of end user, the market is fragmented into adult and children. The adult segment is expected to dominate the market during the forecast period, as oral complications are more prevalent among the adults. According to the United States National Library of Medicine, in 2018 around 80–90% of adolescents between 15 and 19 years of age suffered from mild-to-moderate gingivitis globally, and there is a further rise up to 92–97% in adults aged between 35 and 44 years.

In 2020, North America and Europe collectively accounted for more than 76% of the global electric toothbrush industry, in terms of value, owing to increase in popularity of the electric toothbrush and high disposable income in this region. Asia-pacific is projected to grow at the highest rate, followed by LAMEA, owing to rise in oral health awareness.

Get detailed COVID-19 impact analysis on the Electric Toothbrush Market :-

<https://www.alliedmarketresearch.com/request-for-customization/4580?reqfor=covid>

The COVID-19 pandemic situation boosted the electric toothbrush market expansion. People's concerns about their personal health and hygiene grew as the COVID-19 outbreak spread quickly. The demand for hygiene and personal care products increased as a result of this situation.

One of the most significant market prospects for increase in the electric toothbrush market share is a surge in oral hygiene awareness among young people. The advanced applications of the electric toothbrush such as gum massaging and teeth whitening are likely to drive the electric toothbrush market demand in the coming years. The adoption and integration of innovative technologies is expected to open up new avenues for global electric toothbrush market expansion.

The requirement to replace the head of electric toothbrushes every three to six months is a possible major hurdle to the market's expansion. The cost of replacing the head is likely to deter people from using electric toothbrushes. On the other hand, the electric toothbrush market growth is expected to accelerate due to the change in global market dynamics and technological

advancements. These electric toothbrush market trends drive the market growth.

A large number of major firms are concentrating their efforts on the dynamic markets of North America and Europe. Furthermore, most parts of the world are seeing an increase in the use of technology assessment as a development strategy. The electric toothbrushes are being enthusiastically adopted by the local people in such places, providing an opportunity for major market players.

The global electric toothbrush industry is fiercely competitive, with companies investing much in marketing and product promotion. To penetrate the electric toothbrush market, capture huge market shares, and build brand awareness; the key market players are utilizing new and innovative marketing and promotion strategies to promote their products globally.
