The Warehouse Management System (WMS) is a software that enables companies to efficiently manage their warehouse operations through a set of pre-defined processes. The entire functioning of the warehouse management system includes everything from inventory management, auditing, to picking up goods and materials. Companies are currently implementing warehouse management systems extensively into their work processes to obtain maximum visibility into their inventory in real time, which enables them to make better-informed decisions and thus, improve the overall efficiency of business operations.

Increasing demand for managed services is driving growth of warehouse management systems. Managed services are responsibilities and tasks that are handled by a third party, and they assist companies in significantly lowering operational costs and improving product service quality.

The report also studies the key companies of the Warehouse Management System market along with analysis of their business strategies, M&A activities, investment plans, product portfolio, financial standing, gross profit margin, and production and manufacturing capacities. Some players analyzed in the report are:

Manhattan Associates, Blue Yonder Group, Inc., Körber AG, Oracle, SAP, IBM, Infor, PSI Logistics, PTC, and Tecsys Inc.

#### Regional Segmentation

North America (U.S., Canada)

Europe (U.K., Italy, Germany, France, Rest of EU)

Asia Pacific (India, Japan, China, South Korea, Australia, Rest of APAC)

Latin America (Chile, Brazil, Argentina, Rest of Latin America)

Middle East & Africa (Saudi Arabia, U.A.E., South Africa, Rest of MEA)

Emergen Research has segmented the global warehouse management system market on the basis of deployment, function, application, and region:

Deployment Outlook (Revenue, USD Billion; 2019-2030)

On-Premise

Cloud

Function Outlook (Revenue, USD Billion; 2019-2030)

Labor Management System

Analytics & Optimization

Billing & Yard Management

Systems Integration & Maintenance

Consulting Services

Application Outlook (Revenue, USD Billion; 2019-2030)

Transportation & Logistics

Retail

Healthcare

Manufacturing

Food & Beverage

Others

Key Highlights of Report

Based on deployment, the cloud segment accounted for largest revenue share in 2021. Users can connect and improve every aspect of the supply chain, including inventory management, labor performance optimization, and material flow control, with a cloud-based warehouse management system. Increasing demand for cloud-based management solutions can be attributed to their high scalability, increased reliability, and secure performance. Additionally, this management solution is extensively tested for any operational size and level of complexity.

Based on function, systems integration & maintenance segment accounted for second-largest revenue share in 2021. Integration of warehouse management systems with other efficient software packages gives companies the ability to better monitor and optimize their operations.

Integrating warehouse management systems with transport management systems enables organizations to receive timely and detailed information about warehouse processes, and transportation and distribution to make more informed decisions. In addition, it provides better utilization of the fleet and other necessary resources.

Key Questions Answered by the Report:

Which region is expected to dominate the market in the coming years?

What are the recent technological and product advancements occurring in the market?

What are the key strategies adopted by the prominent players in the Warehouse Management System market?

What are the key product types and applications of the Warehouse Management System industry?

What is the outcome of SWOT analysis and Porter's Five Forces analysis?

How is the competitive landscape of the Warehouse Management System market?

Who are the key players in the industry?

What is the growth rate of the industry over the coming years?

What will be the valuation of the Warehouse Management System Market by 2028?
