

MiCamp Solutions Services High-Risk Industries

The National Credit Card Processing Company Helps High-Risk Companies Succeed

PHOENIX, ARIZONA, UNITED STATES, April 6, 2022 /EINPresswire.com/ -- Guns and ammo. Multi-Level marketing. CBD products. While other credit card processing companies aren't able to serve high-risk industries such as these, [MiCamp Solutions](#) is uniquely positioned to provide the same great services as they do for any other companies.

MiCamp President Micah Kinsler believes in being agnostic when it comes to capitalism. "If you're operating legally in the United States, you should have the same rights as every other company," Kinsler said. "While some may object to the nature of the products being sold by high-risk companies, we believe they still deserve equal representation and service."

The idea behind MiCamp Solutions started in October 2006. Kinsler owned a franchised business and was frustrated with the high fees he paid to process credit card transactions. After doing some research, he discovered that many merchant processing companies were taking advantage of the business owners they were supposed to help. With a desire to help other business owners, Kinsler moved into the payments industry, looking to save money for as many businesses as he could, while helping those businesses grow.

In early 2007, MiCamp opened an office with just four employees. MiCamp's portfolio was soon labeled the fastest growing portfolio on Firserv radar. Since then, MiCamp Solutions has grown into a company with over 150 employees around the country; has become one of the largest clients of Firserv and a trusted business partner for over 20,000 merchants across the United States.

Kinsler continues, "We are a fiscally conservative company, but we refuse to discriminate against

industries that are typically turned away by the traditional credit card processing market. Some of the subject matter involved may be offensive to others, however, these companies should have the same basic rights in our country.”

MiCamp Solutions describes high-risk companies and industries as those that require special attention from their payment providers, due to the potential for commercial disputes and legal restrictions.

About MiCamp Solutions

MiCamp Solutions is an elite ISO (International Standard of Organization) of Fiserv and a member of the prestigious Fiserv Chairman’s Circle. With a known reputation of integrity, competitiveness, and service, it prides itself in supporting customers’ needs and finding innovative solutions that maximize profit. Since 2007, it had helped over 20,000 merchants process \$11 billion in transactions annually. Its success comes from not only providing a cost savings and trusted relationship, but from an ever-expanding portfolio of business solutions.

Today, MiCamp is much more than credit card processing and merchant services. Its key relationships across the international banking and financial landscape have put it in position to provide solutions inaccessible for most ISOs and even larger companies. Being sensitive to the needs of its customers has driven the development of new product offerings in financing, funding, PCI compliance and payment analytics software.

With today’s environment of constant technology changes, security concerns and disruptive innovations, MiCamp Solutions is small enough to be responsive, yet strategically networked to be competitive against the largest competitors. For more information, visit <https://www.micamp.com>.
