

# Blue Light Therapy Market Share, Size, Key Players, Trends, Competitive And Regional Forecast To 2028

*Growing prevalence of skin disorders is one of the significant factors influencing market growth.*

NEW YORK, NY, UNITED STATES, April 5, 2022 /EINPresswire.com/ -- The global [blue light therapy market](#) is expected to reach USD 351.6 Million by 2028, according to a new report by Reports and Data. Blue light therapy

makes use of blue light to treat specific conditions or disorders that may or may not be related to skin and is recognized as a pain-free procedure.

Growing prevalence of acne is likely to boost market demand in the forecast period. Blue light therapy is a kind of noninvasive treatment for acne vulgaris where blue light is deployed to destroy specific acne-causing bacteria on the skin. As per the American Academy of Dermatology, light therapies have proved to be promising in treating acne, and numerous individuals have observed a considerable betterment in the health of their skin after several sessions. It may be implemented to treat conditions that have already occurred on the skin or to control the condition before an acne outbreak occurs.

Increasing prevalence of seasonal affective disorder (SAD) is estimated to drive the growth of the market in the upcoming years. Narrow-band blue light is equally effective as bright white-light for treating SAD, a form of depression associated with seasonal changes. As per the American Psychiatric Association, in the U.S. every year approximately 5.0% of adults suffer from this disorder, which can last for nearly 40% of the year. Women have a higher tendency to get affected by SAD as compared to men, and younger people are more likely to get affected than older ones. Additionally, risk factors for SAD, other than the ones mentioned above, comprise a family history of SAD or some kind of depressive disorder, and bipolar disorder, among others.
