# HttpTwain released to support web-based scanning from Edge, Chromium, and Other non-IE browsers

"Extrieve has announced "HttpTwain," a new Capture SDK that enables web-based capture from any standard browser.

BENGALURU, INDIA, April 6, 2022 /EINPresswire.com/ -- "Extrieve has announced "HttpTwain," a new Capture SDK that enables web-based capture from any standard browser. Earlier Capture SDKs, such as ScanWizX and ImageWizX, will be deprecated, and any capture solutions should utilize the new SDK. The majority of web-based scanning SDKs are now built with ActiveX technology. ActiveX is being phased out and is no longer supported by the most recent browsers. As a result, this SDK is essential for future web-based scanning needs.

HttpTwain released to support web-based scanning - Extrieve

Benefits

Web-based scanning can now be enabled from any major browser using this new SDK. For distributed or high-volume document capture use cases, any enterprise application may be simply integrated with this new SDK. Mobile Apps can also be used to send HTTP requests to Scanners in order to scan documents. The setup is only about 2 MB in size, which is much smaller than any other similar SDK. This helps in faster deployment as well as upgrades.

Major Features

• Scan with Twain / Import Files or Folder
• Profile-based scanning and management.
• Stamping of variable text
• Support upload/download using HTTPS/FTP/sFTP

- View thumbnail images
- Image transformations
- Compressed output creation
