Highlights From The Report.

In August 2020. GIGA Fine Chem, based out of Taiwan, launched ZigaBio E-34, which is a multi-functional and structurally synthesized green algae.

It maintains its stability in air and room temperature and is expected to be integrated actively in cosmetic and skincare products as a potential wound cleanser.

The wipes segment was valued at USD 14.49 billion in 2019 and is anticipated to capture a considerable market share over the forecast period.

This can be attributed to its ease of usage among consumers. Although the affordability and availability is still a concern, yet it is likely to get sorted over the coming years.

Over the forecast period, the hospitals segment is expected to hold a prominent share in the overall wound cleanser products market because of the increasing prevalence of chronic wounds across inpatient settings, especially in ICU.

The homecare settings segment is expected to grow at a CAGR of 3.2%, especially across the developed economies owing to the increasing geriatric population and growing health care

infrastructure and support.

#### Regional Overview:

The global Wound Cleanser Products market has been categorized on the basis of key geographical regions into North America, Asia Pacific, Europe, Latin America, and Middle East & Africa. It evaluates the presence of the global Wound Cleanser Products market in the major regions with regards to market share, market size, revenue contribution, sales network and distribution channel, and other key elements.

#### Global Wound Cleanser Products Market Segmentation:

Product Type Outlook (Revenue, USD Billion; 2017-2027)

Wetting Agents

Antiseptics

Moisturizers

Others
