Increasing developments for unconventional and offshore oil reserves, increased exploration and production activities coupled with growing energy demands worldwide are the key factors driving the growth of the completion equipment market. However, growing environmental concerns and rise in seismic activities are the factors hampering the growth of the market. Furthermore, dwindling number of new oil rigs in the U.S. is a key restraining factor. The inclination towards deep water drilling and growing explorations of new production sites in the arctic region offer huge growth opportunities to the Completion Equipment and Services market.
