The enhanced preference for monoclonal antibodies and biosimilars is the primary driver of immunotherapy drugs market growth. Immunotherapy is a type of cancer treatment that strengthens the nerves against cancer. It utilizes substances produced by the body or in a laboratory to improve the immune system's ability to detect and destroy cancer cells. Immunotherapy has been an important component in the treatment of several forms of cancer in recent decades. The immune system is a collection of organs, specific cells, and substances that aid in the defense against infections and other disorders. Some immunotherapy treatments inhibit cancer cell proliferation. Other treatments boost the immune system in killing cancer cells or preventing cancer from spreading to further areas of the body. Immunotherapy treatments can be used alone or in conjunction with other cancer therapies. Immunotherapy drugs market was valued at US\$ 133.43 Bn in 2020 growing at a CAGR of 10.9% over the forecast period (2022 – 2030). The study analyses the market in terms of revenue across all the major regions, which have been bifurcated into countries.

The global immunotherapy drugs market has been primarily segmented into monoclonal antibodies, immune checkpoint inhibitors, interferons & interleukins, vaccines, and others. Monoclonal antibodies segment held the largest market share in 2020 and is anticipated to retain the share over the forecast period. Some monoclonal antibodies (MABs) are used in immunotherapy. They function by activating the immune system and assisting it in its fight against cancer. Other MABs work by interfering with immune system cells. Checkpoint inhibitors, for example, are a kind of immunotherapy. Checkpoint inhibitors prevent the immune system from attacking cancer cells by inhibiting proteins.

Global immunotherapy drugs market has been classified into cancer, autoimmune diseases, infectious diseases, and others. Cancer segment is further segmented into breast cancer, bladder cancer, brain cancer (brain tumor), colorectal (colon) cancer, melanoma, kidney cancer, and others. Cancer held a substantial market share in 2020 owing to increasing cancer incidences globally. In 2020, According to data from GLOBOCAN, there will be nearly 2,261,419 (11.7%) new breast cancer cases, 2,206,771 (11.4%) new lung cancer cases, and 1,931,590 (10%) new colorectum cancer cases. Breast cancer is one of every four cancers diagnosed in women worldwide.
