

Smith Industries Announces Addition of Utility Division in Midland TX

Installation of the largest Press Brake in West Texas

MIDLAND, TX, UNITED STATES, April 6, 2022 /EINPresswire.com/ -- Today [Smith Industries](#) announced the installation of the largest press brake in West Texas, expanding their capabilities to the Utility Industry. Press brakes are high powered industrial sheet metal bending machines that are used for a number of metal fabrication operations. The addition of the press brake to the Smith Industries portfolio puts them to the forefront of machining capabilities. "Our goal is to become a leader in the utility industry by offering superior craftsmanship, unwavering integrity, and a total commitment to customer satisfaction" said Chris Smith, President at Smith Industries.

The largest press brake in West Texas

Key Specifications

- 89' Bending Length Capability
- 2200 Tons Capacity
- Each press brake offers 29.5' x 1100 Tons of bending capacity individually
- Over 24' between side frames
- Over 5' Throat Depth
- 4' of Daylight
- 2 Individual press brakes that can operate in unison, essentially offering the production capability of 3 press brakes.
- Adjustable Lower Vario Die, providing a high degree of versatility for a wide variety of applications. Die range from 2" -16" with 1" adjustment increments. Extremely easy and quick to adjust, helping ensure quick tool adjustments to help maximize efficiency

Industry Applications
