IMDb qualifier's Hollywood on the Tiber Film Awards celebrates one of the most important chapters in the history of cinema. The definition of Hollywood on the Tiber was born in the early 1950s, when the American majors decided to play for the first time several films in Europe, choosing Rome as the new capital of film production. The idea was a winning one! Two cultures were able to merge thanks to the magic of the cinema, proving that the seventh art knew no cultural barriers. Today, with their Award, they want to affirm once again that cinema is not only poetry, culture and fun, but also an extraordinary tool to give people the opportunity to know each other. That is why they believe that cinema is also a great opportunity for humanity, because cinema can teach us to live in peace in this world that hosts us.

“

Winning the 'Best Inspirational Film' award is so special and something I will always treasure. I made this documentary to help others so this is such a blessing and I am very grateful - thank you!"
