Market Overview:

The chemical industry is expected to register significant revenue growth over the coming years driven by a recovery in domestic demand due to rising prices of crude oils and better exports. The chemical and material industry has undergone radical changes owing to long-term trends such as the evolution of advanced technologies such as the industrial internet of things (IIoT), artificial intelligence, machine learning, automation, and efficient data management tools. Increasing demand for novel chemical products such as soaps and detergents, particularly amid the COVID-19 pandemic, improvements in operational efficiency, and the development of energy-efficient manufacturing and production processes are some other factors expected to
