

Mulch Films Market 2021 Future Trend, Growth Rate, Opportunity, Industry Analysis to 2028

Rising demand for higher crop yield due to reducing arable and agricultural land are key factors driving mulch films market growth.

NEW YORK, NEW YORK, UNITED STATES, April 10, 2022 /EINPresswire.com/ -- The global <u>mulch</u> <u>films market size</u> is expected to reach USD 6,697.2 Million by 2028 and

register a steady CAGR over the forecast period, according to a latest report by Reports and Data. Rising demand for mulch films can be attributed to steady reduction in availability of agricultural land and changing climatic conditions. Rapid industrialization and urbanization have resulted in decline in availability of agricultural land. This has resulted in increased pressure on currently available arable land to yield more crops by deploying various methods, including the use of mulch films.

Growing emphasis on effective water consumption is driving demand for mulch films. Effective water consumption is of high significance in soil moisture retention. In dry weather conditions with infrequent or scarce rainfall, soil water retention is of prime importance, and mulch films can retain almost 80.0% of added moisture in soil.

COVID-19 Impact:

The COVID-19 pandemic has severely disrupted global supply chains and created an oversupply situation for mulch film producers. Besides, the forced lockdown and movement restrictions had resulted in a shortage of workforce required to install mulch films in agricultural fields. The situation is returning to the new normal, and the demand and supply equilibrium for mulch films is projected to stabilize as a result.

Some Key Findings in the Report

Clear/transparent mulch films have no color/pigment additive and are used to rapidly raise soil temperature levels for quick development of plant roots and for preventing groundwater from evaporating

The biodegradable mulch films segment revenue is projected to expand at a significant rate during the forecast period, as these are greener substitutes for other mulch films. These allow farmers and gardeners to skip the collection of mulch films when the growth cycle ends, as biodegradable mulch films do not leave any residue similar to common plastic mulch films. Biodegradable mulch films produced from lactic acid or corn starch allow for rapid degradation of mulch films.

The linear low-density polyethylene segment held the largest market share in 2020. Most of the commercially used plastic mulches are produced from linear low-density polyethylene, owing to properties such as good root zone maintenance, soil structure improvement, better weed control, soil moisture regulation, and deterrence of pests.

Key market players include the Dow Chemical Company, Novamont SPA, RKW Group, British Polythene Industries PLC, BASF SE, Armando Alvarez Group, Berry Global Inc., Ab Rani Plast Oy, AEP Industries Inc., and AL-Pack Enterprises Ltd.

Key Benefits of Buying the Global Mulch Films Report:

Comprehensive analysis of the changing competitive landscape

Assists in decision making processes for the businesses along with detailed strategic planning methodologies

The report offers an 8-year forecast and assessment of the Global Mulch Films Market Helps in understanding the key product segments and their estimated growth rate In-depth analysis of market drivers, restraints, trends, and opportunities Comprehensive regional analysis of the Global Mulch Films Market Extensive profiling of the key stakeholders of the business sphere Detailed analysis of the factors influencing the growth of the Global Mulch Films Market

About Reports and Data

Reports and Data is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely focus on your purpose to locate, target, and analyze consumer behavior shifts across

demographics, across industries, and help client's make a smarter business decision. We offer market intelligence studies ensuring relevant and fact-based research across multiple industries, including Healthcare, Touch Points, Chemicals, Products, and Energy. We consistently update our research offerings to ensure our clients are aware of the latest trends existent in the market. Reports and Data has a strong base of experienced analysts from varied areas of expertise. Our industry experience and ability to develop a concrete solution to any research problems provides our clients with the ability to secure an edge over their respective competitors.
