Electric tile saws, also known as Dry Wheel Cutter or Dry Vacuum tile saws, are clever pieces of machinery that make use of powerful dry chemicals to cut through the tile. The chemicals used in Electric tile saws are not hazardous to the environment. They will kill everything in their path, so don't think you can be really "green" by using one of these machines. Electric tile saws do however produce amazingly beautiful cuttings with very little effort. The typical application of tiles is in the construction industry.

Tiles are one of the most essential elements in flooring application and available in a wide range of variety. With the rapid growth of the construction industry, the demand for novel tiles has increased over the years. As per the India Brand Equity Foundation (IBEF), India is expected to become the world's third-largest construction market by 2022. As a result of this, the demand for flooring tiles has increased, subsequently rising the demand for tile cutters. Hence, such factors can stimulate growth of the electric tile cutter market.

Over the years, the tile sizes and their overall availability has changed significantly. There is a wide variety of tiles available in the market with an extensive range of sizes and suitable for different buildings including residential, commercial, and industrial. Besides, electric tile manufacturers are focused on strengthening their product portfolio by launching novel products. Hence, such factors can potentially augment growth of the electric tile cutter market in the near future.
