“

“Medical knowledge, research, and decision-making are similarly founded and supported by causal reasoning, both in creating new knowledge and everyday clinical applications.”

Lee Forstrom.

with his published book titled Science and Logic in Medical Diagnosis: In Defense of Individual Patients. A book about health, medicine, and diagnosis. There are different themes in the book being focused on by the author. It talked about correct diagnosis, cause and effect, probabilities, and homogeneity among all humans.

Traditional and radical models of diagnosis were discussed and compared in the book. It may have undesirable shortcomings for both models. Far from dismissing science, but robust medical science, knowledge, experience, and professional clinicians, and it continues in

caring for her or his patients.

Currently living in Wayzata, Minnesota, Dr. Lee Forstrom has pursued a long career in medicine. He taught philosophy of science and logic at Simon Fraser University. His practice and research spanned the scope of nuclear medicine, internal medicine, radiology, and the philosophy of science.
