

Aesthetic Lasers Market Size, Share, Trends, Growth, Top Companies & Forecasts To 2028

Aging baby boomers and middle-class surplus earnings to spend on cosmetic surgery.

NEW YORK, NY, UNITED STATES, April 9, 2022 /EINPresswire.com/ --

The [Aesthetic Lasers Market](#) is forecast to grow from USD 1.06 Billion in 2020 to USD 2.38 Billion by 2028, at a CAGR of 10.8% during the forecast period.

The market is primarily driven by increased global warming resulting in severe skin damage and sunburn, increased use of oral contraceptives among women, and phototoxic drug use.

Technology advancement has enabled needle-free procedures, thereby boosting the rate of laser treatment adoption. As a preventive measure, young people also opt for cosmetic procedures and slow down the aging process.

Strict regulations are projected for cosmetic laser products to ensure increased device efficiency while treating the skin without adverse effects. In addition to the radiation safety performance standards defined by the Federal Regulations, laser device manufacturers must comply with the Federal Food, Drug, and Cosmetic Act. The increasing adoption of energy-based devices and market player's low focus on aesthetic devices restrict this market's growth.

In 2020, total cosmetic surgery expenditure was USD 13.22 Billion. There has been an increase of 43% in male participation over 5 years. This presents key companies in the market with an attractive opportunity to target men for non-operative cosmetic surgery.

Market Dynamics:

The pharma and healthcare sector has significantly advanced in the recent years and is expected to register steady revenue growth over the forecast period owing to rapid innovations in medical technology, increasing investments, rising healthcare expenditure and high adoption of advanced products and systems. Factors such as rising prevalence of chronic diseases such as diabetes, cancer, cardiovascular diseases, and neurological disorders across the globe, rising

Reports And Data

cases of coronavirus, improving healthcare infrastructure and research facilities, and increasing adoption of remote patient monitoring services and home care settings are expected to fuel global market revenue growth over the forecast period. In addition, increasing number of hospitals and ambulatory care centers worldwide, high demand for personalized medicine, increasing investments in drug discovery and growing investments by public and private sectors are expected to drive global market growth in the coming years.

The report also offers detailed insights about market segmentation based on type, application and regional bifurcation:

Aesthetic Lasers Market Segmentation:

Type (Revenue, USD Million; 2018-2028)

- Multiplatform Laser Devices
- Standalone Laser Devices
- Alexandrite Lasers
- Carbon Dioxide (Co2) Laser
- Diode Lasers
- Er:YAG (Erbium YAG) Laser
- Neodymium:Yttrium-Aluminum-Garnet (Nd:YAG) Laser
- Pulsed Dye Lasers (PDL)
- Others

Application (Revenue, USD Million; 2018-2028)

- IPL Laser Treatment
- Laser Skin Resurfacing
- Noninvasive Tightening
- Laser-Assisted Lipoplasty
- Laser Hair Removal

End User (Revenue, USD Million; 2018-2028)

- Hospitals
- Private Surgery Centers/Clinics
- Medical Spas & Centers
- Others
