exploration agencies are very important to many Americans as the organization's advancements in space have inspired citizens to be more curious about the Galaxy. There are studies that support higher test scores being associated with children who show an early interest in the solar system. In addition, according to a Harvard study children who were more aware of the Galaxy excelled in

Science, English, and Mathematics.

[National Look Up at the Sky Day](#) was founded by Jack Borden, a broadcaster who created this national day to further encourage the importance of taking a moment to look up at the sky.
