SHERIDAN, WYOMING, UNITED STATES, April 11, 2022 /EINPresswire.com/ -- According to the latest report by IMARC Group, "Car Rack Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2022-2027", The global [car rack market is expected to exhibit a CAGR of 5.9% during 2022-2027.](#)

A car rack is an automotive metal frame attached on top of a vehicle for carrying luggage and other bulky items. It consists of crossbars, towers, gear mounts, and fitting pieces that are evenly spaced to support the weight of the luggage. Car racks are manufactured using lightweight materials, such as steel, aluminum alloys, and composite plastic. Their utilization allows easy transportation of items, increases luggage capacity, and provides comfort to passengers without compromising the interior space. There are different types of car racks commercially available, which include bare roof, rain gutter, side rails, factory bars, and fixed point.

Market Trends

The growth of the global car rack market is primarily being driven by the rising expenditure in the tourism and automotive industries across the globe. This, along with rapid urbanization and the increasing spending capacity of consumers, is further supporting the market growth. Additionally, the rising population and the increasing popularity of outdoor recreational activities are inflating the demand for extra luggage space in vehicles. Moreover, manufacturers are introducing fiberglass car racks integrated with new mounting technologies, which is accelerating the market growth.
