Government initiatives to minimize carbon emissions is likely to drive the carpooling market. Major metropolitan cities have traffic congestion with an increase in the vehicle density on the roads, increasing the carbon emissions. In the Paris agreement on climate change, countries have set determined targets for carbon footprint reduction by 2030. For instance, the Delhi government in India has introduced an odd-even scheme to control the traffic density and keep a check on carbon emissions in the city. Corporates such as Amazon, Infosys are also encouraging car-pooling to commute to workplaces to reduce congestion and air pollution. The initiatives to keep a check on carbon emissions thereby contribute to the growth of the market.

Major players covered in the global carpooling industry are Didi Chuxing, Dida Chuxing, Uber, Via Transportation, Lyft Line, Waze Carpool, Zimride, Carma, and Scoop Technologies
