

Multiple Sclerosis Therapies Market Forecast Till 2027 Covering Key Player like Pfizer, Hoffman-La Roche, Merck & Co Etc

Multiple sclerosis is a neurological condition that affects the central nervous system and optic nerves

VANCOUVER, BC, CANADA, April 11, 2022 /EINPresswire.com/ -- [Multiple sclerosis](#) is a neurological condition that affects the central nervous system and optic nerves. It is a progressive autoimmune inflammatory disorder of the CNS that causes degeneration of the nerves in the brain and spinal cord. Although multiple sclerosis was identified centuries ago, there is still no viable cure for the condition. Drugs are available that target the condition and work by alleviating the symptoms of the patients and enhancing the overall quality of life.

Multiple Sclerosis Society, nearly 1 million people across the United States have multiple sclerosis, and over 2.3 million people worldwide have the disease. These numbers observe a substantial addition every year, which propels the biopharmaceutical companies to develop more drugs for multiple sclerosis. Additionally, increasing initiatives by the government to raise awareness about multiple sclerosis drives the need for efficient treatment.

COVID-19 Impact on the Multiple Sclerosis Drugs Market

The COVID-19 pandemic has affected several industry verticals worldwide by inducing supply chain disruptions and economic volatility. It has adversely affected the healthcare sector as increasing investment towards developing a viable vaccine for COVID-19 illness led to declining demand for drugs for other chronic conditions. Moreover, the decreasing outpatient consultations and concerns regarding the efficiency of disease-modifying treatments during the pandemic are negatively affecting the market. The concerns regarding the mode of actions and the body's response to those drugs are expected to hamper the growth of the multiple sclerosis drugs market in the coming years.

The Multiple Sclerosis (MS) Therapies Market report includes information on the product launches, sustainability, and prospects of leading vendors including are as : Biogen, Inc. Pfizer, Inc.

Hoffman-La Roche, Ltd.

Sanofi

Merck & Co., Inc.

Bristol Myers Squibb Company

Novartis AG

Teva Pharmaceutical Industries, Ltd.

Celgene Corporation

Bayer AG

Acorda Therapeutics, Inc.

Others

Some Key Highlights of the Report :

A comprehensive overview of the Global Multiple Sclerosis Drugs Market along with analysis of the essential market driving and restraining factors

In-depth analysis of the current and emerging trends and growth prospects of the industry

Complete assessment of the competitive landscape with particular focus on key strategies, expansion plans, developments and advancements, product portfolio, and revenue generation

Strategic recommendations to key players and new entrants to fortify their presence in the market

Comprehensive analysis of the impact of the COVID-19 pandemic on the market
