The report covers key developments in the Tuberculosis Drug market as organic and inorganic growth strategies. Various companies focus on organic growth strategies such as launches, product approvals and others such as patents and events. Inorganic growth strategies observed in the market have been acquisitions, partnerships, and collaborations. These activities have paved the way for expanding the business and customer base of market participants. The market players are expected to face lucrative growth opportunities in the future with the rising demand for the Tuberculosis Drug System market in the global market. The report also provides comprehensive PEST analysis for all regions covered in Global Tuberculosis Drug Market

Report.

The study has classified the market into segments including product type, application and more. Each segment is evaluated by share and growth rate. Also, the analysts have studied the potential regions that could prove rewarding for the manufacturers in the coming years. The regional analysis includes reliable forecasts on value and volume, helping market participants to gain deep insights into the overall industry. Besides the segment breakdown, the report is heavily structured into a regional study. The researchers' regional analysis highlights key regions and their dominant countries which account for a significant revenue share in the Tuberculosis Drug Market. The study helps to understand how the market will develop in the respective region.

Industry Trends

Tuberculosis (TB) is an infectious disease that is usually caused by *Mycobacterium tuberculosis* (MTB) bacteria. Although tuberculosis is known to generally affect the lungs of patient, it can also affect other parts of the body. As this infectious diseases is affecting millions of people worldwide, the increasing bacterial drug resistance is also threatening a rise in TB cases as many drugs are ineffective against TB treatment. Hence, a surging need for new antibiotics to cure TB is encouraging research & development (R&D) institutions to pacify investments, which showcases substantial growth prospects for the global tuberculosis drug market over the forecast period.

Many factors are driving the global tuberculosis drug market but the most important factor is the growing incidences of tuberculosis in developing countries. TB patients can be seen all over the world but according to a survey, 95% deaths from tuberculosis are in developing countries. Hence, higher demand for drugs that can be useful for tuberculosis treatment comes from developing countries. Many companies manufacturing such drugs see developing countries as target markets. However, the concerns pertaining to high cost of treatment is impeding the growth of the global tuberculosis drug market.

The strategic initiatives being undertaken in the global tuberculosis drug market is expected to inflate market growth in the near future. TB Alliance and Macleods forged a commercial partnership for new therapy for highly drug-resistant TB in October 2019. In another instance, the Drug Controller General of India (DCGI) approved an anti-tuberculosis drug pretomanid, called Mylan Secures, under the National Tuberculosis Elimination Program (NTEP) program in July 2020.

The COVID-19 pandemic has led to a tremendous rise in concern about the health of children because coronavirus can rapidly endanger the life of a patient suffering from TB. Regarding lungs, coronavirus and tuberculosis have similar symptoms. Hence, scientists are experimenting

with many drugs useful for tuberculosis treatment to see if they can be used for the treatment of coronavirus.

Key Questions Answered with this Study

- 1) What makes Tuberculosis Drug Market feasible for long term investment?
- 2) Know value chain areas where players can create value?
- 3) Territory that may see steep rise in CAGR & Y-O-Y growth?
- 4) What geographic region would have better demand for product/services?
- 5) What opportunity emerging territory would offer to established and new entrants in Tuberculosis Drug market?
- 6) Risk side analysis connected with service providers?
- 7) How influencing factors driving the demand of Tuberculosis Drug in next few years?
- 8) What is the impact analysis of various factors in the Global Tuberculosis Drug market growth?
- 9) What strategies of big players help them acquire share in mature market?
- 10) How Technology and Customer-Centric Innovation is bringing big Change in Tuberculosis Drug Market?

Global Tuberculosis Drug Market Segmentation:

Tuberculosis Drug Market : By Type of Tuberculosis

- Active Tuberculosis
- Latent Tuberculosis

Tuberculosis Drug Market : By Treatment Type

- First Line Drugs
 - Isoniazid
 - Rifampicin/ Rifampin
 - Ethambutol
 - Pyrazinamide
 - Others
- Second Line Drugs
 - Levofloxacin
 - Moxifloxacin
 - Others

Tuberculosis Drug Market : By Route of Administration

- Oral
- Parenteral

Tuberculosis Drug Market : By Dosage Form

- Tablets
- Capsules
- Powder for Solution for Injection
- Others

Tuberculosis Drug Market : By Distribution Channel

- Hospital Pharmacies
- Retail Pharmacies
- Online
- Others

Tuberculosis Drug Market : By Geography

- North America
 - o US
 - o Canada
 - o Mexico
 - o Rest of North America
- Europe
 - o France
