

## ZE PowerGroup Named a Data Management Leader in Chartis RiskTech Quadrant® for Energy Risk Systems: Data Management 2021

*ZE's Position as Category Leader in the Quadrant Backs Its Phenomenal Performance in the Data Management Sector* 

VANCOUVER, BC, CANADA, April 11, 2022 /EINPresswire.com/ -- <u>ZE</u> <u>PowerGroup</u> Inc. (ZE), as a global leader in end-to-end data management

and analytics technology, received high scores for integrating multiple data sources and the ability to aggregate data from varied sources and deliver it in flexible formats.

## "

ZE's strong data focus means it is well-positioned to manage much of its clients' data requirements, and several deployment options are available to suit different client preferences" *Reports Chartis Research*  According to the Vendor Analysis report, the Chartis RiskTech Quadrant<sup>®</sup> report, ZE was well-placed in the said criterion due to its broad range and a large volume of available data across the energy industry. ZE's offerings were considered "well-designed" with a good user experience.

Curve management was identified as yet another strength of ZE, as the global leader's curve generation and interpolation scores raised because of the recent additions to its curve-building applications.

Furthermore, Chartis analyzed the scalability of the ZE platform, concluding that the ZE product performs well against the set criteria because of its ability to handle and operate through a wide range of implementation sizes. ZE was also shown to be strong in automation, considering its capability to automate, integrate, and transform market data from multiple sources.

All in all, Chartis highlighted the following strengths of the ZE products and platform.

•The availability of real-time market data

An enhanced user interface, an improved dashboard, an innovative graphic engine, and custom business intelligence (BI) support
ZE Cloud for hosted and managed services

A modern charting engine with a new graph editor, chart types, statistical and technical analysis indicators, and annotations
DZEMA-hosted data management and integration platform with the end-to-end capability of automating critical business operations, processing high volumes of data, and reaching global clients

•IIIhe expanded ZE Curve Manager's data model supporting options data persistence

"We view ZE's business model as very strong for data management in the energy space. New data and capabilities are being developed alongside changing client needs, and the company is making efforts to improve and develop user experience elements and reporting. ZE's strong data focus means it is well-positioned to manage much of its clients' data requirements, and several deployment options are available to suit different client preferences, including onpremise and deployment through ZE Cloud, as either a hosted or managed service," reports Chartis.
