

Paraxylene (PX) Market To 2028 High Growth Opportunities, Emerging Trends, Forecast | BASF SE, Reliance Industries etc

Paraxylene (PX) Market Size – USD 43.52 billion in 2018, Growth – CAGR of 9.3%, Trends – Growing demand from the APAC region

NEW YORK CITY, NY, UNITED STATES, April 11, 2022 /EINPresswire.com/ -- The [Paraxylene \(PX\) Market](#) is expected to reach USD 97.69 Billion by 2027, according to a new report by Reports and Data. The growth of the market is attributed to the growing applications of paraxylene (PX) amongst the end-user industries.

Reports And Data

Polyethylene terephthalate (PET) is a polymer produced from the organic chemicals ethylene glycol and terephthalic acid. It is a lightweight and robust plastic extensively used for packaging foods and beverages, particularly juices, soft drinks, and water. Moreover, it is popular for packaging peanut butter, salad dressings, cooking oils, shampoo, mouthwash, liquid hand soap, and window cleaner, among various other items. Special grades of polyethylene terephthalate are used for carry-home food containers and readymade food trays used in the oven or microwave.

Key participants include BASF SE, Reliance Industries Ltd., SINOPEC, Chevron Phillips Chemical Company, BP PLC, Exxon Mobil, Mitsubishi Gas Chemical Co. Ltd., Saudi Aramco, JXTG Nippon Oil & Energy Corporation, and CNPC, among others.

The increasing use of PET in the textile industry is likely to drive the growth of the market in the upcoming years. The fabrics made from polyester fiber chain possess good elasticity, shape retention, wrinkle resistance, exceptional wash & wear performance, washability, and longevity, among others, and as a result, finds extensive application in various types of apparel fabrics. It is used to make fashionable dresses, weather-resistant clothing, and is a preferred material for children's wear. PET fiber is frequently blended with other fibers such as cotton, to get the

combined benefits of both materials. It provides better tear-resistant as compared to cotton or other materials used in making clothing items. At present, over half of the global synthetic fiber is made from this PET.

Market Overview:

The materials and chemical industry has registered a rapid revenue growth over the recent past owing to the constant requirement for materials and chemicals across various sectors including agriculture, pharmaceutical and biotechnology, paper, healthcare, food and beverage, and manufacturing among others. Rapid demand for products like perfumes, soaps, detergents for daily usage, increasing adoption of green energy and organic products, increasing investments in research and development activities, and rising support from various public and private sectors are key factors fueling global Paraxylene (PX) market growth. In addition, factors such as rising disposable income, increasing efforts to reduce carbon footprint and consumer shift to eco-friendly and sustainable products are expected to fuel overall market growth going ahead.

Further key findings from the report suggest

By application, purified terephthalic acid contributed to the largest market share in 2018 and is expected to grow at a rate of 9.3% in the forecast period. Purified Terephthalic Acid (PTA) is used to produce polyester coatings resins for utilization in the formulation of general automotive, appliance, industrial maintenance, and coil coatings, among others.

By distribution channel, the offline channel held a larger market share in 2018. Offline channel is the most preferred channel for distribution as it includes the opportunity for customers to create personal connections with business, which is beneficial in building loyalty

By the end-user, the textile industry dominated the market in 2018. PET fabric, a synthetic fiber, is an economical alternative and has several benefits as compared to cotton. This synthetic fabric does not wear down quickly as well as it is flexible and resistant to shrinking and wrinkles.

The market in the Asia Pacific region contributed to the largest market share in 2018 and is expected to grow at a rate of 9.6% in the forecast period. The market dominance of the APAC region is mainly owing to the growth of the textile and construction industries in the region.

For the purpose of this report, Reports and Data have segmented the global paraxylene (PX) market on the basis of Application, distribution channel, industry vertical, and region:

Application Outlook (Volume, Kilo Tons; 2016-2027 and Revenue, USD Million; 2016-2027)

Purified Terephthalic Acid (PTA)

Dimethyl Terephthalate (DMT)

Others

Industry Verticals Outlook (Volume, Kilo Tons; 2016-2027 and Revenue, USD Million; 2016-2027)

Electronics

Textile

Packaging

Construction

Others

About Reports and Data

Reports and Data is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely focus on your purpose to locate, target and analyze consumer behavior shifts across demographics, across industries and help client's make a smarter business decision. We offer market intelligence studies ensuring relevant and fact-based research across a multiple industries including Healthcare, Technology, Chemicals, Power and Energy. We consistently update our research offerings to ensure our clients are aware about the latest trends existent in the market. Reports and Data has a strong base of experienced analysts from varied areas of expertise.
