Pentagon 2000 Software, Inc. Two Factor Authentication Capability

Add-On Module Enables Extra Layer of Security to Manage System Access

NEW YORK, NEW YORK, UNITED STATES, April 11, 2022 /EINPresswire.com/ -- Pentagon 2000 Software, Inc., the leading provider of fully-integrated MRO and ERP software solutions for the Aerospace & Defense industry, enables customers to implement two factor authentication (2FA) as an additional security measure to verify user identity at the time of system login.

Enforcement of strong passwords are always recommended for use in enterprise systems, but

> "PENTAGON 2000SQL is the benchmark For over 30 years we've set the industry standard in fully integrated ERP systems for the Aerospace, Defense, Electronics, Power Systems Metals, MRO and more."
>
> *Pentagon 2000*

through implementation of 2FA in the Pentagon 2000SQL™ system, administrators can add a second layer of protection that requires a second method or factor for user identity and login. The Pentagon 2000SQL™ Two Factor Authentication add-on module allows administrators to configure the system to send a unique one time 8-digit PIN code for each user login attempt that is then required to be entered to gain access to the system.

Benefits to Pentagon 2000SQL™ customers for use of the Two Factor Authentication include increased access security for employees working out of the office and reduced risk of fraudulent access to system data.

For more information about this add-on module and other Pentagon 2000 Software system capabilities, please contact your company representative or send an email to info@pentagon2000.com
