The structured cabling market size is expected to reach USD 15.09 Billion in 2028 at a steady CAGR, according to latest analysis by Emergen Research. Growth of the global structured cabling market is driven significantly by rapid advancements in IT and telecommunication sectors, continuous investment in network and communication infrastructure development and upgradation, increasing government initiatives promoting digitization, and rising adoption of high-speed network connectivity systems and devices. Structured cabling solution includes installing and designing an organized cabling system that offers flexibility to adapt to changes, moves, and additions, and reduces system installation time, as well as supports the entire wiring infrastructure of an organization through a single system. This infrastructure comprises different standardized smaller components called subsystems, such as optical and twisted-pair cabling, patch cables, and patch panels.
