Looking forward,

IMARC Group expects the market to reach US\$ 2.72 Billion by 2027, exhibiting at a CAGR of 8.6% during 2022-2027. The nurse call system (NCS) represents an electrically operated communication solution utilized to alert nurses and healthcare providers in an emergency case. The system is configured with a centralized solution that acts as a single contact mode between the nurses and the patients. It uses numerous components, such as buttons, alarms, communication devices, software services, etc., that synchronize to ensure the nurses are immediately informed of the call. The patient or physician can also press the button to activate the call light and produce a sound at the nurse's desk. The system is integrated with several monitoring systems to track the health of the patients. It allows healthcare organizations to provide quality medical services and managing nursing tasks and activities effectively.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.
