The animal growth promoters and performance enhancers market consists of sales of animal growth promoters and performance enhancers by entities (organizations, sole traders, and partnerships) that manufacture animal growth promoters and performance enhancers. Animal growth promoters and performance enhancers help in the safety of animals from various microbial diseases and also help them to develop into strong and healthy adults. Only goods and services traded between entities or sold to end consumers are included.

Global [Animal Growth Promoters And Performance Enhancers Market Trends](#)

Companies in the market are increasingly investing in phytogenics for higher efficiency of growth promoters through natural means. Phytogenics, sometimes also referred to as botanicals or phytobiotics, are plant-based feed additives utilized in animal nutrition. They are derived from

herbs, spices, and extracts. Phytochemicals can be used in solid, dried, and ground form or as extracts, and also can be classified as essential oils and oleoresins depending on the process used to derive the active ingredients. The use of phytogenics promotes increased feed intake, improved gut function, prevention of diarrhea, and antimicrobial and antioxidative effects in livestock.

#### Global Animal Growth Promoters And Performance Enhancers Market Segments
