The veterinary services market consists of sales of veterinary services and related goods by entities (organizations, sole traders, and partnerships) that provide veterinary services to pets, farm animals, and animals kept in zoos and wildlife parks. This industry includes animal hospitals and veterinary clinics that provide consultation services, treatment, curative medicines to animals.

Global Veterinary Services Market Trends

Telemedicine is gaining traction as this technology enables pet owners to get access to quality care from remote locations. Telemedicine is a subset of Telehealth that includes remote clinical and non-clinical elements of the healthcare system. It refers to the direct communication between veterinarians and clients via communication systems such as phone, mails, and video conference technologies. This technology also helps in improving existing veterinarian-client-patient relationships. Busy lifestyles and consumers' preference for personalized services are driving the demand for telemedicine services.
