

North America Frozen Seafood Market | 2021 | Industry Share, Size, Growth and Forecast till 2026

SHERIDAN, WYOMING, UNITED STATES,

April 15, 2022 /EINPresswire.com/ --

According to IMARC Group's latest report, titled "[North America Frozen Seafood Market](#): Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026", the North America frozen seafood market reached a value of US\$ 13.4 Billion in 2020. Frozen seafood products are preserved for inhibiting the growth of bacteria in order to increase their shelf life, taste, and nutritional value. The seafood freezing technique includes two different approaches, namely, cryofreezing and carboxymethylcellulose. In cryofreezing, seafood items, such as salmon, tuna, shrimp, oysters, and tilapia, are kept in ultra-low liquid nitrogen for maintaining their quality. On the other hand, carboxymethylcellulose is used to curb the adulteration of seafood commodities.

The rising consciousness amongst consumers regarding their health has led to the increasing demand for ready-to-cook (RTC) and ready-to-eat (RTE) food items, which is primarily driving the frozen seafood market in North America. Moreover, the widespread adoption of seafood products due to the presence of proteins, vitamins, and fatty acids is propelling the market growth. Furthermore, the rising inclination of consumers toward frozen food over canned products is expected to create a positive outlook for the market. Looking forward, IMARC Group expects the market to reach a value of US\$ 16.1 Billion by 2026.
